

Postdoc positions available in Bulyk Lab in Boston, MA

We have **two postdoctoral positions** available in the laboratory of Prof. Martha Bulyk for highly motivated individuals with experimental and computational experience who are interested in transcriptional gene regulation. The Bulyk Lab is interested in understanding how regulatory information is encoded in the genome, how that information is read out to regulate gene expression programs, and how genetic variation alters gene regulation.

This project will employ **biochemical, cell culture based, and computational approaches to investigate human transcription factor-DNA interactions**, with a focus on determining the effects of coding variation in transcription factors. This project will employ a range of techniques including but not limited to: DNA cloning; protein expression; mammalian cell culture; genome editing; CUT&RUN or ChIP-Seq; RNA-Seq; PADIT-Seq; DNA and protein sequence analysis; computational analysis of human genetic variation data, Illumina DNA sequencing data and protein structure; and ML/AI. Postdoc position #1 is focused primarily on high-throughput biochemical assays, while postdoc position #2 is focused primarily on genome editing and cell culture based functional genomic assays. Both positions involve computational analysis.

For both positions, applicants should have a recent Ph.D. (2025 or 2026), or will graduate in Fall 2026, in a biological field with strong quantitative skills and prior programming experience. Solid command of spoken and written English is required.

The Bulyk Lab is in the Division of Genetics at Brigham & Women's Hospital, part of the Harvard Medical School research community located at the Longwood Medical Area in Boston, MA. We offer competitive salaries and benefits, and a highly interactive academic environment.

Applicants should email a cover letter and CV to: Prof. Martha L. Bulyk, Harvard Medical School Veritas Science Center Rm 466D, 77 Avenue Louis Pasteur, Boston, MA 02115; [mlbulyk\[at\]genetics.med.harvard.edu](mailto:mlbulyk[at]genetics.med.harvard.edu). In the cover letter, indicate for which postdoc position you are applying, explain why you want to join my lab, and provide your anticipated start date, desired duration for the postdoc position, and longer-term career goals.

Please be sure to indicate in your cover letter if you would require visa sponsorship.
